Films on Demand Playlists

Creating a Playlist
A playlist is a saved list of video segments/titles that can be shown in class to illustrate content, or stimulate discussion, or used as a resource for students to supplement content.

Select “Sign In” located at the top right of the webpage and enter your personal account username and password.

Search for videos and click on the video title you wish to put in a playlist--click “Playlist”.

A panel expands below where you can select multiple segments (by holding down the CTRL key while clicking on a segment you wish to add). Either create a new playlist by typing a new playlist name then clicking “Create New Playlist” or select a prior playlist (if any) from the dropdown menu then click “Add to Playlist”.

Add Selected Items to Playlist:

Add to an Existing Playlist

Or Create a new playlist:
Using a Playlist in Assignments or Teaching Materials

Once logged in, to provide the URL of the playlist, select "Playlists" tab

Highlight and copy the playlist URL into your assignment or teaching materials.
The URL must be in the format “http://digital.films.com/play/id#”.
Ensure that wherever you place the playlist URL that it doesn’t contain anything additional or it may prevent users from accessing the playlist. This is especially true if you are off campus and adding a playlist to course content.
