Appendix A

The following survey questions were asked to fifty students at Georgian College.

Circle the best answer:

1. Do you have a dog? (Yes/No)

If you answered “Yes” to question 1, then answer the remaining questions below:

2. If so, what kind of dog do you have? ______________________________

3. Has your dog demonstrated abilities that dramatically changed a person’s mood from sad to happy?

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

4. Has your dog demonstrated abilities that contributed to a person’s health or healing?

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

Circle the best answer:

5. Do you know of any dogs that have acted in therapeutic roles? (Yes/No)
Appendix B

The following graph shows the relationship between various breeds of dogs in therapeutic roles and human mood swings.
